

# Updated Covid-19 Guidance for Salons

25th January 2022

With the easing of the Covid-19 restrictions & requirements, below we have some key areas for you to risk assess in salon:

**Social Distancing** – No longer required, but you may retain it in your salon if you wish.

**Pre-Screening Questionnaires** – not a requirement. Can continue to use them but consideration should be given to the number & relativeness of questions.

**Refreshments** – Masks are still required in salons. We do not advise serving refreshments to clients during their visit as they will have to remove their mask to consume them.

**Magazines** – Magazines are still recommended to be removed as it is not possible to sanitise them between clients.
